

ITEST

RF & DC

RELIABILITY TEST BENCH

Key Benefits

Turnkey solutions with custom options.

High Voltage/Current testing.

Calibrated RF&DC measurements at DUT reference planes.

Real-time monitoring with our software: Temp, Power, RF, DUT.

Efficient power conversion in a compact design.

Temperature :

- 50°C to 200°C
- Easy mounting and fast clamping
- Monitoring

RF/PA :

- S to Ku-Band capability
- Up to 500W RF output power
- Full independant channel

Pulsed - SMU :

- Up to 120V, 30A pulsed mode and CW
- Voltage and current monitored during quiescent and pulse

- *Our autonomous system acquires and saves all the parameters in the chassis*
- *All the parameters are set up and measured by our Easystress software*
- *Data can be exported to different formats for post-measurement analysis*
